

Central Wisconsin Squadron Spring Conference 2007

Central Wisconsin's Members started out the new watch year with seven members attending and participating in the National Convention at Jacksonville, Florida on February 20 -25th.

The next activities were a variety of meetings to formulate and implements plans for this spring conference on April 13, 14, 15th. Many squadron members have been involved and will continue throughout the weekend with duties and involvement.

This April and May we have two Boat Smart or ABC Classes planned for the boating public. We also have a Sail Class going on for our Squadron members. In the fall there will be a Piloting and a Weather class for our members. We will have another Boat Smart early in September.

We have two Vessel Safety Check Days planned. The first is at Lake Wausau on May 19th and the second at Du Bay Park on June 2nd. We are encouraging members to come and be a part of these days by helping the examiners in various ways to gain knowledge what a VSC examiner does.

In April members are teaching a Seminar of Boating Safety at UWSP and Splash Into Safety for children at John Muir School in Wausau. Last year we served over 100 students and their parents at the sessions.

We have monthly Executive meetings scheduled and six member meetings. In June, July, and August we have some water activity planned for members to be involve in.

A complete schedule of events is listed on our Web site.
